

The Government's plans to raise retirement to 68 whilst introducing a 'flat rate' weekly pension of £155 has provoked the biggest wave of coordinated industrial action in decades.

Up to one million workers from six major unions will strike - our biggest stand yet against the cuts.

We produce everything, all goods, all services, all wealth. If society is being rapidly rearranged against our interests, we have the ability to strike - to take back our work until we have secured our future.

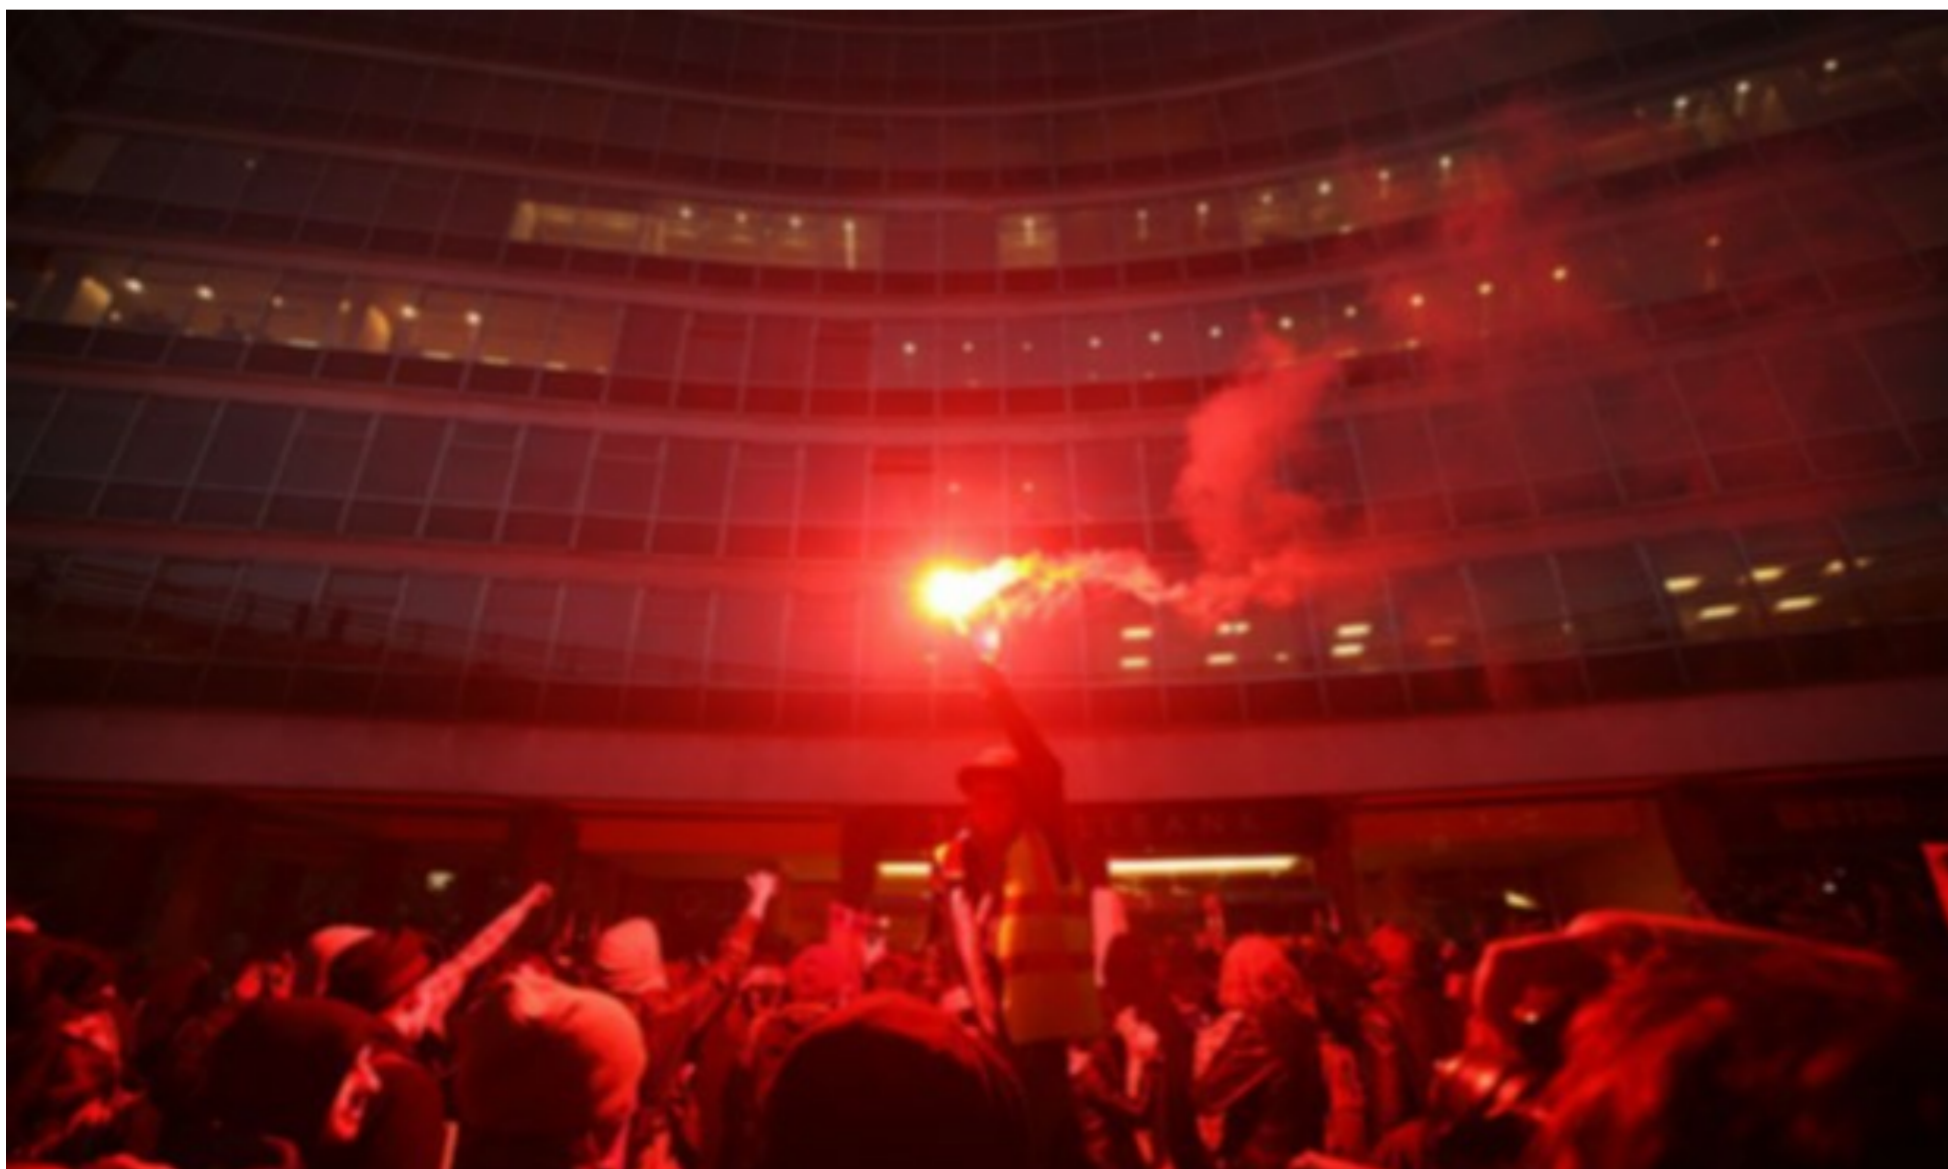

On June 30th, join the pickets - and build for the fights ahead.

WORK TO DEATH...

PERIOD

OR STRIKE TO LIVE!

If your union or workplace is not on strike on June 30th, are you sure you are well enough to go in? With the stress of making ends meet, maybe you should call in sick.

Wherever you work

Whatever you do

Don't work on

JUNE 30th
